

**TAYLOR RESIDENTS**

# COMMUNITY AIR & WATER QUALITY MEETING

## Why Water Quality Matters:

- Contaminated drinking water can spread serious illnesses
- Health risks include diarrhea, cholera, dysentery, and typhoid
- Knowing your water quality helps protect your family and improve community water sources

## Why Air Quality Matters:

- Poor air quality affects people of all ages and health backgrounds
- Linked to asthma, cancer, COPD, heart disease, and hospitalization
- Reducing exposure can improve long-term health and quality of life
